Experience

Web Development Intern

3i-Infotech Ltd. Jun 2025 – Jul 2025

- Learnt Angular.js, React.js under mentorship of industry mentor. Also assisted in developing solutions for Student Education Portal in Bihar Govt.

Projects

RETRIEVIA: Smart Lost and Found System

[GitHub Repo](#) 

[Live Website](#) 

- Designed full stack web app to replace the 10+ daily lost-item reports on University WhatsApp groups, streamlining communication into a structured system.
- Reunites users with lost items with AI NLP. Estimated to handle 300+ reports/month and reduce manual follow-ups by 50%. Tools Used were Node.js, Express, MongoDB, JWT, bcrypt, Hugging Face transformers.

Nearbuy Website

[GitHub Repo](#) 

- Built a hyper-local marketplace web app using React and Firebase where users can buy and sell used items within a 50 km radius. Implemented secure authentication, real-time data storage, location-based filtering, and responsive UI, and deployed the application on Netlify.
- Tools Used: React, Tailwind CSS, Firebase (Auth, Firestore, Storage)

Spotify Clone

[GitHub Repo](#) 

- Built a Spotify-like music player app supporting playlists, play/pause, and responsive UI.
- Tools Used: React.js, CSS, JavaScript.

Student Portal – Patna Government Scheme

[GitHub Repo](#) 

- Designed and help to develop a student portal to manage student records, student loan portal .
- Tools Used: Node.js, Express.js, MongoDB, EJS.

Achievements

- **District Level Cricket Player** — Played over 50 matches, against neighbouring districts promoting to my overall growth, teamwork spirit and leadership quality.

Certifications

[Computational Thinking for Problem Solving](#)  [Data Structures and Algorithms](#)
